

# AUTOMATED ARREST AFFIDAVIT

EVERY AGENCY WANTS TO DO IT AND NOW YOU CAN AFFORD TO

Kologik's Automated Arrest Affidavit solution eliminates much of the time and pain associated with preparing arrest reports. It also ensures that those reports are more complete and accurate than ever before.

## FEATURES:

- ▷ Online and offline Arrest Affidavit creation allows for processing without connectivity
- ▷ Auto populates person and vehicle tag information from the Department of Motor Vehicles (DMV)
- ▷ Captures specific fields based on the type of Affidavit
- ▷ Guides officers through the arrest process and validates each page
- ▷ Sends Affidavit to a supervisor for review, rejection, and approval
- ▷ Electronic Markup allows supervisors to notate fields that need corrections and returns Affidavit to the officer
- ▷ Geocoded USPS address validation for accuracy
- ▷ County or municipal ordinance creation and management
- ▷ Reporting for Affidavits that are submitted
- ▷ NIBRS compliant
- ▷ CJIS compliant

# HOW IT WORKS

When an officer completes an Arrest Affidavit using the mobile client or the web based application, and submits it to a supervisor for approval, the Arrest Affidavit enters the arrest workflow. Arrest Affidavits are processed and routed to supervisors allowing them to take action on the record.

For example, supervisors only receive Arrest Affidavits from officers in their agency. Arrest Affidavits that are rejected for any reason are returned to the arresting officer. The officer must then take corrective action to complete the Arrest Affidavit. The user and group management module allows for the restriction of rights and data access based on the role of the user, such as access to modify county or municipal ordinances.

Once completed, Affidavits can be automatically uploaded to other state systems such as a state repository.

The screenshot displays a web-based form for an Arrest Affidavit. The form is divided into two main sections: 'Incident Location' and 'Offenses'.

**Incident Location Section:**

- INCIDENT DATE\*/TIME/TIME ZONE:** Includes a date picker and a dropdown menu for time zone.
- INCIDENT LOCATION:** Includes fields for STREET NUMBER, PRE-DIRECTION, STREET NAME, STREET TYPE, and POST-DIRECTION, each with a dropdown menu.
- APARTMENT:** A text input field.
- CITY:** A dropdown menu.
- COUNTY\*:** A dropdown menu.
- STATE:** A dropdown menu with 'FLORIDA' selected.
- ZIP:** A text input field.
- LATITUDE:** A text input field.
- LONGITUDE:** A text input field.
- GEO VERIFIED DATE:** A text input field.
- Buttons:** 'Clear Address' and 'Verify Address'.
- Footnote:** '\* - required field'.

**Offenses Section:**

CHARGE SEQUENCE	Counts	Degree	Statute	Description	DV	Delete
1	1	S	379.2426.2	POSSESSION OF SEPARATED SHARK FIN 2ND VIO	<input type="checkbox"/>	<input type="checkbox"/>
2	1	T	379.407.2B3D	TAKE FOOD SHRIMP TORTUGAS BEDS 3RD SUBSO OFF	<input type="checkbox"/>	<input type="checkbox"/>
2	1	F	379.374.1	EXHIBIT VENOMOUS REPTILE W/O BOND SUBSO OFF	<input type="checkbox"/>	<input type="checkbox"/>

**Buttons:** 'Add New', 'Close', 'Previous', 'Next', 'Save'.

Fully integrate Automated Arrest Affidavit with the KOLOGIK suite of interoperable public safety solutions
